Review

Caspian Sea water stage from 10-16 February, 2022

The mean sea level was minus 28,49 m on the Caspian Sea shallow part covered by ice.

On the Caspian Sea deep-water part the mean sea level was minus 28,56 m, maximum – minus 28,06 m, minimum – minus 29,05 m.

Bulletin compiled in the Caspian Sea Hydrometeorological Research Department

**Caspian Sea level forecast* in the area without ice,
17-22 February, 2022**

The sea-level fluctuation is expected about minus 28,55 m, with maximum rise up to the minus 28,07 m and minimum fall to minus 29,05 m (figure 2).

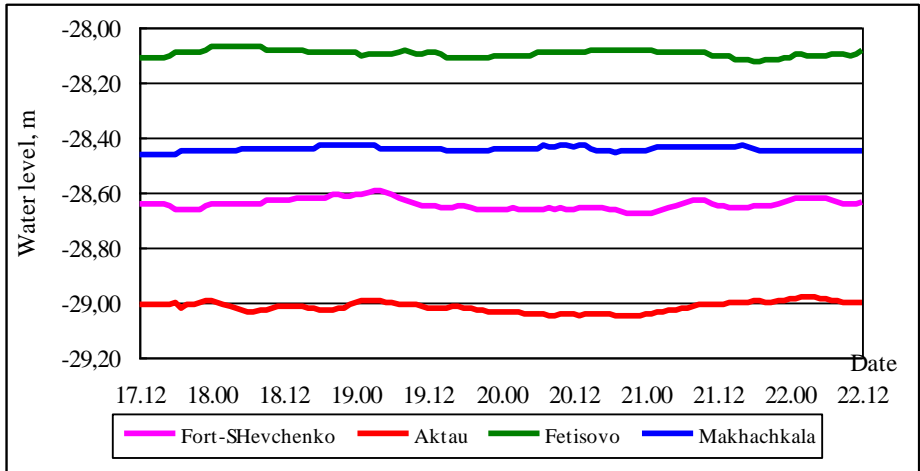

Fig.2. Forecasted sea level varies in the different areas of Caspian Sea

** The characteristics were computed by Hydrodynamic module MIKE 21 of Danish Hydraulic Institute. RSE "KAZHYDROMET" has the module adapted to Caspian Sea conditions. Data of sea level measurements and pressure field numerical forecasting for 24 –120 hours from the European Center Middle Weather forecast, Reading, Great Britain were used in computation. The local conditions were considered when determined specific marks.*

Critical – 50% frequency, dangerous – 25% frequency, extremely dangerous – 2% frequency.

***Caspian Sea level forecast in different stations,
17-22 February, 2022***

| Station | Maximum sea level | | Minimum sea level | | Average value, cm (m abs) |
|-----------------|-------------------------------|------------------------|--------------------------------|------------------------|--------------------------------|
| | Value, cm (m abs) | Date, time | Value, cm (m abs) | Date, time | |
| Fort-Shevchenko | -59 (-28,59) | 2022/02/19 03:00:00 | -68 (-28,68) | 2022/02/20 22:00:00 | -64 (-28,64) |
| Aktau | -98 (-28,98) | 2022/02/22 02:00:00 | -105 (-29,05) | 2022/02/20 08:00:00 | -102 (-29,02) |
| Fetisovo | -7 (-28,07) | 2022/02/18 00:00:00 | -12 (-28,12) | 2022/02/21 18:00:00 | -9 (-28,09) |
| Makhachkala | -43 (-28,43) | 2022/02/18 18:00:00 | -46 (-28,46) | 2022/02/17 12:00:00 | -44 (-28,44) |

***Review of ice conditions in the Caspian Sea,
10-16 February, 2022***

According to satellite images (Figure 1) and operational data of sea stations and posts along the northern coast of the Caspian Sea, there is gradual destruction.
